

# Ventury Injectors

## Salient Features

- ◆ Help to deliver plant nutrients directly into the wetted zone (where root development is intensive) at uniform rate
- ◆ In-built check valve for protecting the injected liquid against back flow
- ◆ Can be used with a large variety of chemicals
- ◆ Uniform application of fertilizers
- ◆ Saves Energy & Manpower
- ◆ Needs less pressure

## Applications

- ◆ Effective for fertigation for different water soluble and liquid fertilizers through micro irrigation systems on proportionate basis

Ventury Model	Injection Rate LPH	Motive Flow LPH
3/4"	50 to 150	1500 to 2000
1"	200 to 450	4000 to 7000
1 1/2"	450 to 1000	5000 to 12000
2" Low Flow	450 to 1000	5000 to 11000
2"	1000 to 2300	12500 to 30000

## Ordering Guide

Ventury Injector	Size (Inch)
	3/4, 1, 1 1/2, 2 Low Flow, 2

For Example – Ventury Injector 1"
